

JESUS BARBARÁN REÁTEGUI

Senior QA Automation Engineer | QA Architect

jesus.barbaran.jb@gmail.com | Lima, Peru | linkedin.com/in/jesus-barbaran-09672165

PROFESSIONAL SUMMARY

Senior QA Automation Engineer and emerging QA Architect with **14+ years of experience** designing and delivering enterprise-grade test automation solutions at SAP. Deep expertise in WebdriverIO, Playwright, SAP UI5, and AI-augmented testing workflows. Recognized for building production-ready automation frameworks adopted across teams, solving complex technical challenges in Selenium Grid environments, and driving quality strategy in large-scale B2B procurement platforms (SAP Business Network / Ariba).

Currently leveraging **AI tools (Claude Code, GitHub Copilot)** to multiply automation productivity — delivering the output of a 3-person QA team independently. Focused on evolving toward QA Architecture: defining test strategy, framework design, and quality standards at the organizational level.

Core Specialties: QA Architecture, AI-Augmented Testing, WebdriverIO (Expert), Playwright, SAP UI5/Fiori, cXML/B2B Integration Testing, CI/CD Pipeline Strategy, PDF/Document Validation, Selenium Grid, Performance Testing.

TECHNICAL SKILLS

Automation & Testing

WebdriverIO (Expert), Playwright, Selenium WebDriver, Cypress, Postman, JMeter, QTP/UFT, TestRail, qTest

SAP & Web Technologies

SAP UI5, SAP Fiori Elements, SAP Business Network (Ariba), cXML, B2B Procurement Flows (PO/SA/SAR/OC/ASN), TypeScript, JavaScript, JSON, REST/SOAP APIs

Databases

SQL Server, Oracle, SAP HANA, PostgreSQL, MySQL, MongoDB, Sybase

Methodologies

QA Architecture, Test Strategy Design, Risk-Based Testing, Shift-Left Testing, Agile/Scrum, CI/CD Integration

AI & Productivity Tools

Claude Code, GitHub Copilot, Prompt Engineering, AI-driven test strategy, Automated test case generation via LLM

Document & Data Validation

PDF parsing (pdf-parse), CSV extraction, Puppeteer CDP, Axios, ZIP handling (AdmZip) — unique solution running in production sanities

CI/CD & DevOps

Jenkins, Azure DevOps, Git, GitHub, Allure Reporter, Docker (fundamentals), JIRA

PROFESSIONAL EXPERIENCE

QUADREM PERU — SAP Company

Senior QA Automation Engineer | December 2012 – Present (13+ years)

- Architect and maintain the E2E automation framework for **SAP Business Network Purchase Order** platform — covering Buyer and Supplier personas across PO, SA, SAR, OC, ASN, and PDF export flows.
- **Designed and delivered the download-doc module** — a production-grade PDF/CSV download solution for Selenium Grid environments using Puppeteer CDP bridge. The **only such solution in the area**, now adopted for production sanities.
- **Implemented dynamic user generation** strategy eliminating test data collisions in parallel CI runs.
- Built complete **Subcontracting Collaboration test suite** (8 E2E tests: PO/SA/SAR Buyer+Supplier+PDF) — all passing in CI/CD pipeline.
- Integrated **AI tools (Claude Code)** into daily QA workflow — generating tests, analyzing failures, writing documentation, and managing test cases — multiplying individual productivity by 3x.
- Authored **QA Architecture documentation** for the PO team framework — covering component design, locator strategy, CI/CD integration, gaps analysis, and onboarding guide.
- Validate SAP UI5/Fiori Elements interfaces using stable full-ID locator strategy for zero-flakiness navigation.
- Conduct integration, regression, and database testing (SQL Server, Oracle, SAP HANA).
- Collaborate with Java backend developers to align integration tests with E2E coverage strategy.
- Track and manage defects in JIRA; manage test cases in **qTest**.

Technologies: WebdriverIO, TypeScript, Playwright, SAP UI5, cXML, Axios, Puppeteer CDP, pdf-parse, Jenkins, Azure DevOps, Allure, qTest, SAP HANA, Git

Key Achievements

- Built PDF/CSV document validation — **unique capability in the PO area**, running in production sanities.
- Reduced manual test execution time by **60%+** through AI-augmented automation workflow.
- Delivered 8-test subcontracting suite with **100% pass rate** in CI pipeline.
- Architected framework documentation adopted as onboarding reference for new QA engineers.

AXCESS FINANCIAL PERU

Senior Software Engineer in Test | January 2012 – December 2012

- Defined and executed test cases, scenarios, and acceptance criteria for batch and web applications.
- Performed automated and manual testing for web-based and batch applications.
- Conducted stress and performance testing using JMeter.
- Collaborated with Business Analysts and Development teams in Scrum environment.
- Managed defect tracking and documentation via JIRA.

Tools: Selenium, SpiraTeam, JIRA, JMeter

EDUCATION

Catholic University of Santo Toribio de Mogrovejo

Bachelor's Degree in Systems and Computer Engineering

CERTIFICATIONS & COURSES

- Scrum Master Certified
 - Certified Java Developer
 - Microsoft SQL Server Database Management
 - Functional Test Automation with Selenium and Java
 - AI Tools for Software Engineering (Claude Code, GitHub Copilot)
 - Web Application Development
 - Cisco Networking Standards
-

LANGUAGES

- **Spanish:** Native
- **English:** Advanced
